

# Innovative Biobased Products : Opportunities for substituting non-renewable resources.

-

## France vision

G7 - Alliance on Resource Efficiency – Berlin – 23th of november

# Biobased products : an important issue for France

- Biobased products : opportunities in a country of primary production
  - Added value for territory
  - Reduce dependance on fossil raw materials
  - Solution for ecologic transition

# Existing tools to support the development of biomass use

- Policy on biofuels
- Support to Research and innovation with the *Investments for the Future programme*
- Energy transition for green growth act promulgated in 2015
- ...

# A bioeconomy strategy to gather actors and to provide a vision

- A Necessity to build o broad vision
- A formal bioeconomy strategy by mid 2016
- An important place for biobased products

# Some specific points of the French reflection

- A broad definition, including ecosystemic services, like carbon storage
- An important link with the local level
- A cross-sectorial approach
- A « good management » vision

# Previsionnal outline and strategic orientation

- I. The bioeconomy in France : a reality meeting current and future challenges
- II. Diagnostic of the French bioeconomy
- III. Strategic orientations
- IV. Implementation of the strategy

# Previsionnal outline and strategic orientation

Theme	Ideas of orientations
Bioressources	Biomass observation and statistics, new biomass, reflection on application of « food first » principle
Industry and production system	Highlighth the bioreffinery concept, stimulate synergy, build new supply chains
Market	A better access to market : public procurement, standardisation
Society	Public debate, communication
Sustainibility	A more global approach
Research and developpement	Support cross-disciplinary work
Skills	A better anticipation of needs, attract workers
Implementation	Build a broad governance, involve regional level

# International cooperations are important

- Some international issues :
  - Knowledge transfer
  - Trade of biomass
  - Standart
- Necessity to work together
